SUMMARY

Unity Game Developer with professional internship experience and hands-on experience building 3D and multiplayer games. Skilled in C#, Unity, Netcode for GameObjects, Unity Gaming Services, gameplay programming, and AI. Interested in building polished gameplay systems and learning new technologies.

EXPERIENCE

- **Unity Developer Intern** *April 2026 – September 2026*
 - Developed gameplay systems and features for **Astro Blasters**, a 3D space shooter built in Unity.
 - Implemented enemy AI, level and event sequencing, UI features, and gameplay flow.
 - Worked with **Unity Netcode for GameObjects** on multiplayer features and player state synchronization.
 - Worked with Git/GitLab in a team development environment.
 - Fixed gameplay bugs and improved existing systems across multiple game levels.

PROJECTS

- **Grave Shift (Multiplayer)**
 - Developed a cooperative multiplayer game using **Unity Netcode for GameObjects**.
 - Implemented **UGS Authentication, Lobby, Relay, and Friends** for online multiplayer.
 - Built multiplayer game flow, player synchronization, task management, revive system, and player customization.
 - Implemented monster spawning, player interactions, game states, achievements, and gameplay UI.
 - Developed and tested the game for **Android** with an in-game update workflow.
- **Tower defense**
 - Developed a wave-based tower defense game with progressively challenging enemies.
 - Built a grid-based tower placement system using Unity Grid.
 - Implemented tower purchasing, upgrades, enemy spawning, object pooling, and progression systems.
- **Rogue Blade**
 - Developed a top-down wave-survival game focused on defending a home base from increasing enemy waves.
 - Implemented Object Pooling to efficiently manage repeated enemy spawning.
 - Applied OOP, Observer, and Singleton patterns to structure gameplay and enemy systems.
- **Mask/Off (Global Game Jam 2026)**
 - Contributed to a 3D cooperative platformer developed during **Global Game Jam 2026**.
 - Designed game levels and environments using Blender.

TECHNICAL SKILLS

- **Programming:** C#, Java, OOP, DSA
- **Game Development:** Unity, Gameplay Programming, Multiplayer, AI, Pathfinding
- **Networking:** Netcode for GameObjects, Unity Gaming Services, Lobby, Relay, Friends, Authentication
Tools: Git, GitHub, GitLab, Blender, Krita.

EDUCATION

- **BE (Electronics and Communication Engineering)** | Kongu Engineering College CGPA: **8.89/10** (2022-26)

ACHIEVEMENTS

- **1st Place** - Codathon (KEC), an intra department level coding competition, KEC.
- **2nd Place** - Ideathon'24 ECE, KEC.
- **Top 25** - Gen AI Hackathon, a national level hackathon by Intel and KPRIET.
- **Top 25** - Neo Codathon (KEC) coding competition for overall college, KEC.
